

NOTICE OF CHANGE IN MICHIGAN ORAL AND MAXILLOFACIAL SURGERY EXAMINATION REQUIREMENT

On December 12, 2013, the Michigan Board of Dentistry adopted a resolution recognizing that the examinations and evaluative processes required to successfully complete a CODA-accredited oral & maxillofacial surgery residency program are substantially equivalent to the Michigan examination used for a Michigan oral and maxillofacial surgery license. As a result, applicants for a Michigan oral & maxillofacial surgery license who demonstrate they have graduated from an ADA-CODA accredited oral and maxillofacial surgery program will be issued a Michigan oral and maxillofacial surgery license as long as all other licensure requirements are satisfied.

Qualifying applicants for a Michigan oral and maxillofacial surgery license do not have to successfully complete a Michigan oral and maxillofacial surgery examination. No Michigan exam for an oral and maxillofacial surgery license will be given in 2014. Applications for a Michigan oral and maxillofacial surgery license can be found at
